

# Water Capture Wheelie Bins Available from

David Gray Water Capture Wheelie Bins 140L

Great for thirsty garden beds and Fruit Trees!

140 Litre "Plant-Direct" Model

Release Tap Model

The **Watering Wand Model** is designed to provide the operator with **Plant-Direct** watering capabilities.

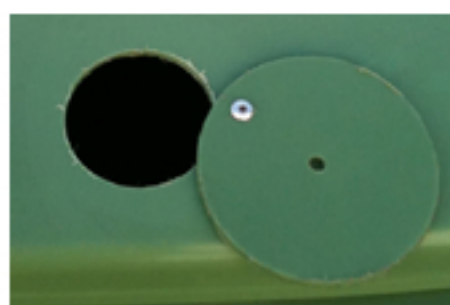

**Watering Wand** allows the user to accurately direct the captured water to the base of the plant, thereby giving extreme watering efficiency.

**Four Wheels** configuration is essential for easy wheeling of the bin when its full of water, as the standard two-wheeler has a tendency to create an unstable wave which is difficult to keep under control.

**Loop & Nipple Lid Lock System** is a simple and easy way hold the lid down and prevent loss of water and splash on the operator.

Available Colours:  Dark Green, Light Green  
Dark Grey, Sky Blue

The **Release Tap Model** is designed with the **Watering Can**, or **Drip Feed Irrigation** of Garden Beds and Trees in mind.

Water In-Let Opening with sliding cover (standard on both models)

Anti-Splash Loop & Nipple Lid Lock Down System

For the capture and reuse of water around the garden.
